

1 WHAT IS CLAIMED IS:

2 1. A bodyboard comprising:

3 a body with an edge with a front, a rear and two sides and comprising
4 a core having a top, a bottom and multiple holes defined in the top
5 and the bottom;

6 an upper layer securely attached to the top of the core; and

7 a lower layer securely attached to the bottom of the core; and

8 a protective strip mounted on the edge of the body along the front and
9 two sides of the body.

10 2. The bodyboard as claimed in claim 1, wherein each hole is a through
11 hole defined through the core from the top to the bottom.

12 3. The bodyboard as claimed in claim 2, wherein the protective strip
13 comprises two strip elements mounted respectively on the sides of the body and
14 extending to and abutting at the front of the body.

15 4. The bodyboard as claimed in claim 3, wherein the upper layer is made
16 of a foaming material selected from one of a group consisting of crosslinked
17 polyethylene, ethylene-vinyl acetate copolymer foam, polypropylene foam and
18 polyethylene foam.

19 5. The bodyboard as claimed in claim 4, wherein the protective strip is
20 made of a foaming material the same as that of the upper layer.

21 6. The bodyboard as claimed in claim 3, wherein the core plate is made
22 of a material selected from one of a group consisting of epoxy resin, expandable
23 polystyrene (EPS), expandable polypropylene (EPP) and expandable
24 polyethylene (EPE).

1 7. The bodyboard as claimed in claim 3, wherein the lower layer is made
2 of a material selected from one of a group consisting of polypropylene (PP) and
3 polyethylene (PE).

4 8. The bodyboard as claimed in claim 1, wherein the protective strip
5 comprises two strip segments mounted respectively on the sides of the body and
6 extending to abutting at the front of the body.
